# 1、对象的实例化

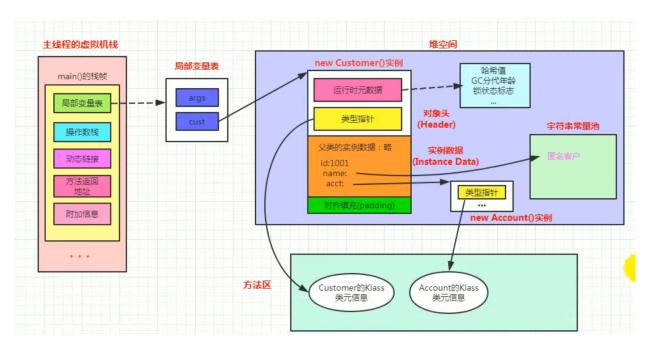

# 该P105

## 2、对象的内存布局

#### 图片详解:

```
public class Customer{
   int id = 1001;
   String name;
   Account acct;

{
     name = "匿名客户";
   }
   public Customer(){
     acct = new Account();
   }
}
class Account{
}
```

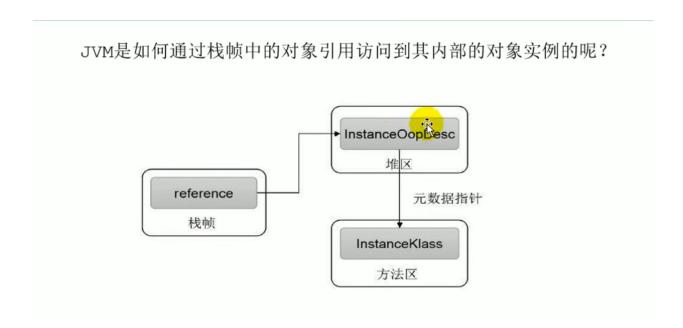

```
package com.atguigu.java;

package com.atguigu.java;

/**
   * @author shkstart shkstart@126.com
   * @create 2020 18:42

   */
public class CustomerTest {
    public static void main(String[] args) {
        Customer cust = new Customer();
    }
}
```

## 3、对象的访问定位

### 对象访问的方式 (主要有两种)

1、句柄访问

### 2、直接指针 (Hotspot采用)
